

Being and Time

potentiality of latent possibilities
the essence of technology is revealing
(techné)

"Enframe" the world;
as utility for human purposes

The modern technology is different,
it lost its special relationship w. nature,
rather than regarding nature as "being",
modern technology regards nature as
"source of resources"!

Human beings are also part
of the natural world !!!??

Human Resources !?

MARTIN
HEIDEGGER
(1889-1976)

Opposes Cartesian Dualism
(Subject / Object)

Study "beings" vs. study "Being" *

A Dasein ask questions about its
own existence ! (other "beings" don't?)

A Dasein is an ontological being,
constantly engaged in tasks he cares about

- Care Structure
- Facticity → the world you were thrown into
 - Fallenness → the other dasein imposing on you
 - Existentiality → possibilities / the potentiality you have

Thinking vs. Calculating

Facticity
Fallenness
Existentiality
Authenticity

Only
facticity
& fallenness
Inauthenticity

graveyards
→ ultimate possibility !!!

Influenced by:

Aristotle
St. Augustine
E. Husserl

*** Phenomenology

Studies the human consciousness
thru which human experiences things

Recognizing this
is "Bracketing"

Natural Attitude vs. raw phenomena

Observing the world (Object)
as a subject

Heidegger rejects Descartes'
subject & object dualism!
Asks "What is being?"

Dasein *

Being-in-the-world

"being" & "world" are inseparable!
